

SIGMA DENTAL

Non- sterile gown 15 grs

Materials: Polypropylene (PP) is a type of plastic made from a combination of several different monomers.

Specification: One size fits all, non-woven insulation dresses. The complete cover provides security and cleanliness. The isolation dresses are light, breathable and comfortable. They cover your body and clothing, and create a physical barrier to the transfer of microorganisms and other materials. Durable material for dependent protection. Breathable material to avoid the accumulation of hot temperature. Available in sizes S, M and L.
