

SIGMA DENTAL

## Protection Disposable Caps

**Materials:** Polypropylene (PP) is a type of plastic made from a combination of several different monomers.

**Specification:** Disposable caps for full head coverage. The double-stitched elastic band keeps the cap flat and comfortable on the forehead. Moisture resistant, non-toxic with waterproof, breathable and dry fabric. These protective polyethylene caps allow excellent comfort and stability. Perfect adjustment. Can be used in dustproof, surgical, chemical, etc.
